

## **DAB** At Home

DAB home radios currently on the market include tuners, kitchen radios, CD players, clock radios, boom-boxes, midi-systems, home cinema systems and separates that plug into existing hi-fi systems. Whilst some manufacturers have developed DAB-only products, others have developed combined DAB/FM/AM/CD/MP3 units. Manufacturers have also catered for the possibility of receiving text, so the displays are large enough for data transmitted along with the radio programme. Models delivering additional features have also been developed, with rewind and pause; record functionality and electronic programme guide (EPG) are also being integrated into some models.

### Clock Radios

#### **Acoustic Solutions**

- DAB/FM clock radio – Band III
- Snooze function
- Retailing at 60 EUR (approx)

#### **BT - Aviator**

- DAB/FM portable clock radio, Band III
- MP3 player – pause/record/rewind
- Mains & battery operated
- Retailing at 185 EUR (approx)

#### **Crown - CR240**

- DAB/FM clock radio – Band III
- Mains & battery operated
- Retailing at 93 EUR (approx)

#### **Genus GEO 1**

- DAB/FM clock radio – Band III
- Mains & battery operated
- Retailing at 100 EUR (approx)

#### **Goodmans -GCDR1930DAB**

- DAB/FM clock radio
- Mains & battery operated

## DAB Anywhere

DAB Hand-held receivers and accessories are now reality, as several companies have developed smaller, lower-powered chips to allow the creation of truly portable DAB digital radios. DAB Products enabled with DMB functionality are also entering the market to receive tv-like services – these are also listed below.

### Acoustic Solutions PA51

- DAB/FM personal radio - Band III
- Retailing at 100 EUR (approx)

### Bush - PSDAB2004

- DAB handheld; aerial integrated into headphones; 12 hrs battery; Band III
- Retailing at 90 EUR (approx)

### Grundig -GRD300 DAB

- DAB handheld - Band III
- Retailing at 90 EUR (approx)

### Mikomi Personal DAB /FM Radio

- Personal DAB/FM receiver - Band III
- Battery operated
- Retailing at 110 EUR (approx)

### Nevada – ND-01

- DAB/FM handheld radio - Band III
- Mains or battery operated
- Retailing at 140EUR (approx)

### Philips - DA1000

- DAB/FM - 12-hrs battery life & mains
- Antenna integrated into earphones
- Retailing at 150 EUR (approx)

### PURE Digital - PocketDAB 1000

- DAB handheld, antenna integrated into earphones
- 16-hrs battery life - Band III
- Retailing at 140 EUR (approx)

### Sony XDMR1

- Handheld DAB/FM radio – Band III
- Mains or battery operated
- Retailing at 208 EUR (approx)

### Samsung – Portable DVD player

- DMB-enabled DAB Portable DVD player with 6 inch 16:9 screen
- Battery life is 2h 30min

[DMB-enabled]

### Alba PRDAB200MP3

- DAB/FM & MP3 player - Band III
- Rechargeable
- Retailing at 155 EUR (approx)

### Ferguson –FRG810D

- DAB/FM handheld - Band III
- Three line LCD display
- Retailing at 112 EUR (approx)

### LG - SB 120

- DMB-enabled DAB mobile phone (2.4 QVGA screen)
- Receives DAB & multimedia features, inc DMB video services

[DMB-enabled]

### Morphy Richards 29200

- Personal DAB/FM/MP3 radio

## DAB In the Car

Most DAB in-car radios consists of 3 parts; the digital radio black box (stored in the boot, under the seat or behind the dash board), a compatible head unit and a compact digital aerial. All in-car DAB receivers combine DAB, FM and AM. Some manufacturers also produce receivers that are complete all-in-one digital radios without a boot box and which fits into standard mounting frames. DAB Products enabled with DMB functionality are also entering the market to receive tv-like services – these are also listed below.

### Acoustic Solutions DAB-ICS 100

- DAB in-car Adaptor – connects to most car radios. Band III
- 6 station presets; Large LCD display – Retailing at 150 EUR (approx)

### Alpine - TUA-100DAB

- DAB boot box compatible with 3 head units - This head unit has FM/AM, CD player, MP3 compatibility - Band III and L-Band- Retailing from 515 EUR (approx)

### Blaupunkt – Woodstock DAB54

- DAB 1-DIN car radio with FM/AM, CD Player, MP3 recording/playback, digital SD and MMC memory cards; recording function with 30 seconds pre-record capability; bluetooth technology

### Blaupunkt – Nashville DAB35

- DAB/FM/MW/LW car radio with CD player with MP3 recording/playback, digital SD and MMC
- Dual band (Band III and L-Band)

### Clarion – DAH923

- DAB boot box compatible with 10 head units and with language selection for display messages - Band III and L-Band; retailing at 330 EUR (approx)
- The head unit featured is the Clarion DXZ958RMC, which retails at 580EUR (approx)

### JVC – KT-DB1000

- DAB hideaway boot box compatible with over 10 head units - Band III and L-Band
- This head unit adds MP3/CD player and FM/AM tuning - retailing at 445 EUR (approx)

### JVC – KD-LHX601

- DAB 1-DIN car radio with CD, CD-R, CD-RW, MP3, WMA files with over 10 head units. This head unit adds, CD player and FM/AM tuning - Band III and L-Band
- Retailing at 550 EUR (approx)

### Kenwood - DAB Tuner KTC-9090DAB

- DAB boot box compatible with almost any of the company's head units - Band III and L-Band
- Retailing at 460 EUR (approx)
- The head unit featured is the KDCW4531, which adds CD/MP3 player and retails at 150EUR (approx)

### LG – in car

- DMB-enabled DAB PC in car (197 x 102 mm) [DMB-enabled]

### Perstel DMR123

- Car-type DMB-enabled DAB receiver - 12cm TFT LCD
- Remote control - Stereo speaker and FM transmitter
- Multi lingual display and OSM (on screen menu) [DMB-enabled]

### Perstel DMR432

- DMR 432 is a DMB-enabled DAB set top box
- It connects to any LCD in car monitor & with existing car stereos
- Compatible to any type of standard monitor [DMB-enabled]

### Pioneer – DEH-P90DAB

- DAB in-car 1-DIN unit with FM/AM, CD player and other special features - Band III and L-Band
- Retailing at 1180 EUR (approx)

### ROADSTAR - CD-200DABMP

- DAB in-car unit with CD/MP3 player - dual band tuner (Band III and L-Band)
- Retailing at 179 EUR (approx)

### Revo – Digital Revo

- DAB in-car adaptor (Band III). Turns a radio into a DAB radio, optional home & mobile kits available
- Retailing at 285 EUR (approx)

### Siemens VDO - MS4000

- DAB boot box compatible with three head units and can be linked to a navigation system which gives voice instructions - Band III and L-Band
- Retailing at 880 EUR (approx)

## And Your Computer

DAB PC receivers plug into your computer and allow you to listen to your preferred digital radio programmes and access data services whilst working on your computer. The receiver's functions are directly controlled from your computer screen. LG and Samsung have produced two DMB-enabled DAB PC notebooks. Perstel has also produced a DMB-enabled USB device which will enter the market soon.

### Terratec – DRBox1

- DR Box 1 works with a home stereo system as well as a PC via the USB port. It allows realtime or scheduled audio recordings such as WAP, MP2 or MP3.
- All data services can be displayed with a standard web browser - Band III and L-Band
- Retailing at 399 EUR (approx)

### LG - Express LW40 model

- DMB-enabled DAB PC Notebook
- 14-inch wide LCD screen.
- Celeron M 1.4GHz CPU, 512MB DDR2 memory, and 60GB HDD,
- Priced at 1.59 million won in retail

[DMB-enabled]

### Samsung –Notebook & Handheld PC

- DMB-enabled DAB PC Notebook and handheld PC
- Prices unknown

[DMB-enabled]

### Trinloc PC-DAB Adaptor

- DAB/MP3 player
- Retailing at 179 EUR (approx)

### **[Pause/Rewind functionality]**

Products that have a Pause/Rewind functionality are able to pause or rewind live DAB services if listening has been interrupted or something has been missed. With a single press of a button you can rewind or put a station on hold. After the interruption, listening can continue from the point at which you left it or you can rewind to retrieve what you have missed.

Some products can pause/rewind for up to 40 minutes depending on the station you are listening to. Other products have a smaller memory capacity and can pause for up to 5 minutes..

### **[DMB-enabled]**

The World DAB Forum recently endorsed two applications, designed to broadcast AV(audio and video) streaming and multimedia to mobile handsets, using DAB as a transport medium and integrated wherever a DAB infrastructure already exists. The first of these is the DMB (Digital Multimedia Broadcasting) application recently approved by the European Telecommunications Standard Institute (ETSI). The second is an application, which uses IP to broadcast the content to mobile devices.

Products capable of receiving video and multimedia services are being developed by a number of manufacturers in the in-car, PC, PDA-like and mobile phone form factors. LG, Samsung and Perstel were the first to capitalise on these new opportunities with the launch of the first DMB enabled devices.

A selection of DAB products has been on the market since 1999. Most manufacturers have established a mid-range price point. For the audio enthusiast there are more expensive products on offer. Receiver prices will vary from country to country.
