ITU-T Recommendation E.218

ITU-T E-SERIES RECOMMENDATIONS

OVERALL NETWORK OPERATION, TELEPHONE SERVICE, SERVICE OPERATION AND HUMAN FACTORS

INTERNATIONAL OPERATION	
Definitions	E.100–E.103
General provisions concerning Administrations	E.104–E.119
General provisions concerning users	E.120–E.139
Operation of international telephone services	E.140–E.159
Numbering plan of the international telephone service	E.160–E.169
International routing plan	E.170–E.179
Tones in national signalling systems	E.180–E.189
Numbering plan of the international telephone service	E.190–E.199
Maritime mobile service and public land mobile service	E.200–E.229
OPERATIONAL PROVISIONS RELATING TO CHARGING AND ACCOUNTING IN THE INTERNATIONAL TELEPHONE SERVICE	
Charging in the international telephone service	E.230–E.249
Measuring and recording call durations for accounting purposes	E.260–E.269
UTILIZATION OF THE INTERNATIONAL TELEPHONE NETWORK FOR NON-TELEPHONY APPLICATIONS	
General	E.300–E.319
Phototelegraphy	E.320–E.329
ISDN PROVISIONS CONCERNING USERS	E.330–E.349
INTERNATIONAL ROUTING PLAN	E.350–E.399
NETWORK MANAGEMENT	
International service statistics	E.400–E.409
International network management	E.410–E.419
Checking the quality of the international telephone service	E.420–E.489
TRAFFIC ENGINEERING	
Measurement and recording of traffic	E.490–E.505
Forecasting of traffic	E.506–E.509
Determination of the number of circuits in manual operation	E.510–E.519
Determination of the number of circuits in automatic and semi-automatic operation	E.520–E.539
Grade of service	E.540–E.599
Definitions	E.600–E.649
Traffic engineering for IP-networks	E.650–E.699
ISDN traffic engineering	E.700–E.749
Mobile network traffic engineering	E.750–E.799
QUALITY OF TELECOMMUNICATION SERVICES: CONCEPTS, MODELS, OBJECTIVES AND DEPENDABILITY PLANNING	
Terms and definitions related to the quality of telecommunication services	E.800–E.809
Models for telecommunication services	E.810–E.844
Objectives for quality of service and related concepts of telecommunication services	E.845–E.859
Use of quality of service objectives for planning of telecommunication networks	E.860–E.879
Field data collection and evaluation on the performance of equipment, networks and services	E.880–E.899

ITU-T Recommendation E.218

Management of the allocation of terrestrial trunk radio Mobile Country Codes

Summary

This Recommendation specifies the structure of the terrestrial trunk radio ITSI, and describes the manner by which the ITU-TSB shall allocate and manage the (T)MCC.

The administration of the (T)MNC by a National Administration is a national matter and is therefore outside of the scope of this Recommendation.

Source

ITU-T Recommendation E.218 was approved on 28 May 2004 by ITU-T Study Group 2 (2001-2004) under the WTSA Resolution 1 procedure.

FOREWORD

The International Telecommunication Union (ITU) is the United Nations specialized agency in the field of telecommunications. The ITU Telecommunication Standardization Sector (ITU-T) is a permanent organ of ITU. ITU-T is responsible for studying technical, operating and tariff questions and issuing Recommendations on them with a view to standardizing telecommunications on a worldwide basis.

The World Telecommunication Standardization Assembly (WTSA), which meets every four years, establishes the topics for study by the ITU-T study groups which, in turn, produce Recommendations on these topics.

The approval of ITU-T Recommendations is covered by the procedure laid down in WTSA Resolution 1.

In some areas of information technology which fall within ITU-T's purview, the necessary standards are prepared on a collaborative basis with ISO and IEC.

NOTE

In this Recommendation, the expression "Administration" is used for conciseness to indicate both a telecommunication administration and a recognized operating agency.

Compliance with this Recommendation is voluntary. However, the Recommendation may contain certain mandatory provisions (to ensure e.g. interoperability or applicability) and compliance with the Recommendation is achieved when all of these mandatory provisions are met. The words "shall" or some other obligatory language such as "must" and the negative equivalents are used to express requirements. The use of such words does not suggest that compliance with the Recommendation is required of any party.

INTELLECTUAL PROPERTY RIGHTS

ITU draws attention to the possibility that the practice or implementation of this Recommendation may involve the use of a claimed Intellectual Property Right. ITU takes no position concerning the evidence, validity or applicability of claimed Intellectual Property Rights, whether asserted by ITU members or others outside of the Recommendation development process.

As of the date of approval of this Recommendation, ITU had not received notice of intellectual property, protected by patents, which may be required to implement this Recommendation. However, implementors are cautioned that this may not represent the latest information and are therefore strongly urged to consult the TSB patent database.

ITU-T Recommendation E.218

Management of the allocation of terrestrial trunk radio Mobile Country Codes

1 Scope

This Recommendation specifies the structure of the terrestrial trunk radio ITSI, and describes the manner by which the ITU-TSB shall allocate and manage the (T)MCC.

The administration of the (T)MNC by a National Administration is a national matter and is therefore outside of the scope of this Recommendation.

2 References

The following ITU-T Recommendations and other references contain provisions which, through reference in this text, constitute provisions of this Recommendation. At the time of publication, the editions indicated were valid. All Recommendations and other references are subject to revision; users of this Recommendation are therefore encouraged to investigate the possibility of applying the most recent edition of the Recommendations and other references listed below. A list of the currently valid ITU-T Recommendations is regularly published. The reference to a document within this Recommendation does not give it, as a stand-alone document, the status of a Recommendation.

- ITU-T Recommendation E.190 (1997), *Principles and responsibilities for the management, assignment and reclamation of E-series international numbering resources.*
- ITU-T Recommendation E.212 (2004), *The international identification plan for mobile terminals and mobile users.*
- ITU-T Recommendation X.121 (2000), *International numbering plan for public data networks.*

3 Abbreviations

This Recommendation uses the following abbreviations:

IMSI	International Mobile Subscriber Identity
ITSI	Individual Terrestrial trunk radio Subscriber Identity
MCC	Mobile Country Code
MNC	Mobile Network Code
NRA	National Regulatory Authority
SSI	Short Subscriber Identity
(T)MCC	Terrestrial trunk radio Mobile Country Code
(T)MNC	Terrestrial trunk radio Mobile Network Code

4 Structure of the ITSI

The ITSI is a different numbering resource than the E.212 IMSI, and though the structure has some commonality to ITU-T Rec. E.212 IMSI identity, the ITSI differs in the length of its component parts.

An Individual Terrestrial trunk radio Subscriber Identity (ITSI) has three component parts:

- a Terrestrial trunk radio Mobile Country Code ((T)MCC);
- a Terrestrial trunk radio Mobile Network Code ((T)MNC); and
- a network-specific short subscriber identity (SSI).

These parts have fixed number lengths.

The ITSI structure and format are as shown in Figure 1.

Terrestrial trunk radio Mobile Country Code (T)MCC	Terrestrial trunk radio Mobile Network Code (T)MNC	Network-Specific Short Subscriber Identity SSI
10 bits 3 digits	14 bits Up to 4 digits	24 bits 8 digits

Figure 1/E.218 – Structure of ITSI

The format of the number is defined only at the air interface, where each part is separately encoded as a binary string.

5 Allocation and administration of Terrestrial trunk radio Mobile Country Codes ((T)MCC)

Terrestrial trunk radio Mobile Country Codes have the same digit representation as E.212 Mobile country codes. However, the (T)MCC is a separate and distinct resource. Prior to the ITU-TSB administering the (T)MCC, a terrestrial trunk radio industry body administered the resource. A consequence of this situation is that an initial allocation of (T)MCCs has been made. The initial allocation appears in Annex A. However, it was recognized that under such an administrative regime, not all Administrations would know of such an allocation. This Recommendation can be taken as notification of the allocation to (T)MCC resources to the Administrations.

Annex A shall only be updated when there are subsequent allocations to the E.212 MCC. The same digits shall be used in the (T)MCC list as used in the E.212 MCC list.

A (T)MCC shall not be allocated independently of E.212 MCC allocations. If an Administration were to apply for a (T)MCC and that Administration did not have an E.212 MCC, then the ITU-TSB should advise that Administration to apply for an E.212 MCC first. (T)MCC allocation will only occur when a future E.212 MCC allocation is made.

A (T)MCC shall be allocated only to national Administrations which have been allocated country-specific E.212 MCC. There shall be no allocation of (T)MCCs to entities other than national Administrations. Where E.212 MCCs have been allocated or in future are allocated to such entities, then the (T)MCC equivalent shall be marked "Reserved" and should not be used within terrestrial trunk radio systems.

6 Allocation and administration of Terrestrial trunk radio Mobile Network Codes ((T)MNC)

The administration of Terrestrial trunk radio Mobile Network Codes is a national matter. Further guidance on the administration of the elements of the ITSI, other than the (T)MCC, is found in the bibliography.

Annex A

Initial allocation of Terrestrial trunk radio Mobile Country Codes

A) List of terrestrial trunk radio Mobile Country Codes – Numerical order

<i>Code</i>	<i>Country or Geographical area</i>	<i>Code</i>	<i>Country or Geographical area</i>

SERIES OF ITU-T RECOMMENDATIONS

Series A	Organization of the work of ITU-T
Series B	Means of expression: definitions, symbols, classification
Series C	General telecommunication statistics
Series D	General tariff principles
Series E	Overall network operation, telephone service, service operation and human factors
Series F	Non-telephone telecommunication services
Series G	Transmission systems and media, digital systems and networks
Series H	Audiovisual and multimedia systems
Series I	Integrated services digital network
Series J	Cable networks and transmission of television, sound programme and other multimedia signals
Series K	Protection against interference
Series L	Construction, installation and protection of cables and other elements of outside plant
Series M	TMN and network maintenance: international transmission systems, telephone circuits, telegraphy, facsimile and leased circuits
Series N	Maintenance: international sound programme and television transmission circuits
Series O	Specifications of measuring equipment
Series P	Telephone transmission quality, telephone installations, local line networks
Series Q	Switching and signalling
Series R	Telegraph transmission
Series S	Telegraph services terminal equipment
Series T	Terminals for telematic services
Series U	Telegraph switching
Series V	Data communication over the telephone network
Series X	Data networks and open system communications
Series Y	Global information infrastructure, Internet protocol aspects and Next Generation Networks
Series Z	Languages and general software aspects for telecommunication systems
